Warmth in the heart of your home

The heart of a home is where it's warmest. It's where people can come together, kick their boots off and relax. It's hugs, chats, comfy socks and a cosy fireplace flickering away behind you.

For over thirty years we have been designing stoves in Britain that create the kind of warmth that feels like home. Our fires have burned in cast-iron and steel, across hearths and shelters, through changing seasons, technologies and fuel sources.

At ACR, we are proud to produce some of the finest electric and gas stoves on the market. Stoves that honour the standards and aesthetics of our woodburning heritage while proudly commanding a new contemporary space of their own.

Forgoing traditional fuel sources, our gas and electric stoves are exempt from most fuel-burning restrictions, offering the warmth of an open fire with a level of ease that other traditional stoves cannot match.

Flames at your fingertips. Our stoves can be controlled from their units and from the supplied remotes, allowing the scheduling of the fire's temperature and operation times. The electric stoves are also programmable via the ACR Stoves app, from which an almost limitless choice of flame effect colours can also be selected.

Electric Range

If you're looking for convenience, then an electric fire is a perfect solution for creating atmosphere and warmth within your home.

With life-like flames, adjustable heat and minimal maintenance, an ACR electric insert or stove is your perfect electric solution, with a model to suit all living spaces.

All our electric stoves are built of a high-quality, lightweight steel and finished with a durable black powder-coat for style as well as durability. Each of our electric models comes with a 2-year warranty.*

All inserts and stoves have two heat settings (please see individual product pages for specifications) to provide instant heat with thermostatic control and the convenience of a 7-day timer. All adjustable from the fully programmable remote control, or via the ACR App on your smart device for even greater fine tuning. There is also an option for the flame effect only with no heat. Our insert and stove ranges also feature various lighting options as standard to suit your mood and room ambience.

For thoroughly modern homes and living, our range of electric stoves and inserts really do offer the best of traditional and contemporary, with all the convenience you could hope for.

See our electric stoves and inserts in action

A fire that's better than real

The LED flame projection technology in our electric stoves produces an effect almost indistinguishable from a traditional fire. Flames within our stoves develop in the front, middle and back of the fire bed for a greater sense of depth and tangibility and are framed by crystal embers and ceramic logs for added realism.

Essential insert and stove information

Insert and stove construction

Our range of electric stoves and inserts are manufactured from lightweight, but durable steel and finished in a traditional black powder-coat, to keep them looking their best for many years. As electric stoves do not reach the very high internal temperatures of a woodburning stove, there is no need for cast iron or heavyweight steel components. This means our stoves are lighter in weight but still retain the look and feel of a real stove and offer much greater durability than similar products.

The electric fire experience

Featuring incredibly realistic LED 3D holographic flame projection, with 4 flame settings – high flame, medium flame, low flame and a smouldering embers effect, our electric inserts and stoves really do have that real fire ambience. LED lighting ensures longevity and lower running costs. Realistic ceramic logs resting on a bed of crystals give the appearance of glowing embers and further adds to the atmosphere. All inserts and stoves have two selectable heat settings (please see each model for actual heat outputs) – and also a no-heat setting so you can still enjoy the flame effect on warmer evenings or for when no additional room heating is required. All of our inserts and stoves feature various options for lighting and flame colour, all selectable from the multifunction remote control supplied as standard or by using the downloadable ACR App. All of our electric inserts and stoves feature a thermal cut-out safety device to protect the appliance from over-heating.

Putting you in control of your insert and stove

All of our inserts and stoves are supplied with a convenient 2-in-1 intelligent remote control. All the day-to-day functions, such as turning the stove on and off and adjusting the flame effect settings, are directly accessible with an LED screen to show your chosen settings. Slide open the lower section of the handset to reveal the programmable 7-day timer facility with a three settings per day timer and fully adjustable thermostatic control. All our stoves also feature onboard controls for turning the stove on and off and for adjusting the heat and flame effect settings too. Our insert and stove ranges can also be operated through a smart app, available for installation on your smart device, giving you even greater flexibility to tailor your fire to suit your needs and mood.

2-year warranty

Designed and engineered to the highest standards, we pride ourselves on offering a premium quality electric stove experience, this is fully backed up by our extensive 2-year warranty for your peace of mind. Full warranty details and exclusions can be found on our website <https://acrheatproducts.com/warranties>

Installation information

Our electric stove and insert ranges offer incredible realism and heat from just the flick of a switch. In most instances, you can simply plug in and you're up and running, but please note that clearances to combustibles must be observed and a hearth may be required. Please consult your ACR dealer for further information if you are unsure.

Stove accessories range

A range of specially designed accessories are also available to enhance your electric stove installation. With gloss black hearth plates for a straight wall and corner settings and matching flue pipe kit suitable for all of our electric stoves, there is also a glass black top plate and storage base plinth available exclusively for the Neo range and a log store base option for the Malvern. Please see page 32 further details.

*All warranties cover all stove castings, they do not include consumable items such as glass and door seals. The full warranty is only honoured when the stove is purchased from one of our recommended dealers. If a stove from any of our brands is purchased from a non-recommended dealer only a 12-month warranty will be honoured. Full details on this policy can be found in our warranty section of the website and full warranty details can be provided by our recommended dealers.

The Seren Insert Range

For a more modern look, our versatile Seren insert range creates a homely ambience with desired warmth, whilst oozing contemporary style.

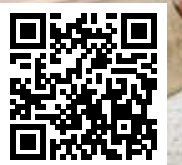

Seren 70

1.5kW

Transform your living space with the charm of a real fire, without the hassle.

Our compact electric Seren 70 insert fire is designed to fit seamlessly into your existing fireplace or mounted beautifully on any wall, offering instant ambience and modern convenience.

- 🔥 Super realistic LCD Flame Technology with 12 LED colour settings and 4 back flame options.
- 🔥 Ambient downlight and ember bed lighting with glowing ceramic logs.
- 🔥 Real fire crackling sound.
- 🔥 Smart app control.
- 🔥 Customise the look with a detachable frame.
- 🔥 2-year warranty.

Astwood

1kW/2kW

The convincingly real Astwood is happy to take your log burner's place. With a classic, domed glass shape and a traditional finish, this stove ignites all the familiar qualities of a log burner – it's just a whole lot easier. Suited to modest spaces where it can bring up the temperature while fitting snugly into its surrounds.

- High quality but lightweight steel construction with a traditional black powder-coat finish.
- Incredibly realistic LED 3D holographic flame projection with 64 different effect options – including coloured flame effects, high flame, medium flame, low flame and smouldering embers only.
- The LED flame effect can be used without heat so you can enjoy a flickering fire all year round with minimal energy usage.
- 'Flame Projection Technology'* creates flames in front, centre and rear of the fuel bed.
- Ultra-realistic ceramic logs with crystal embers for a natural embers glow.
- Whisper quiet flame effect.
- 7 day programmable 2-in-1 intelligent remote control for convenient adjustment of all stove settings and features.
- ACR app available for smart devices to give enhanced control of your fires settings.
- Safety thermal cut-out in the event of over-heating.
- 2-year warranty.

*Patent applied for.

Trinity

1kW/2kW

Modernity has its advantages. The Trinity is an award-winning contemporary electric stove with distinctive side window panels, lending the flicker of its flame to every corner of your room. As with all the ACR electric range, the feature flames develop at the front, middle and back of the fire bed giving it a very realistic flame effect.

- High quality but lightweight steel construction with a traditional black powder-coat finish.
- Incredibly realistic LED 3D holographic flame projection with 64 different effect options – including coloured flame effects, high flame, medium flame, low flame and smouldering embers only.

Gas Range

We are proud to introduce you to our latest gas models.

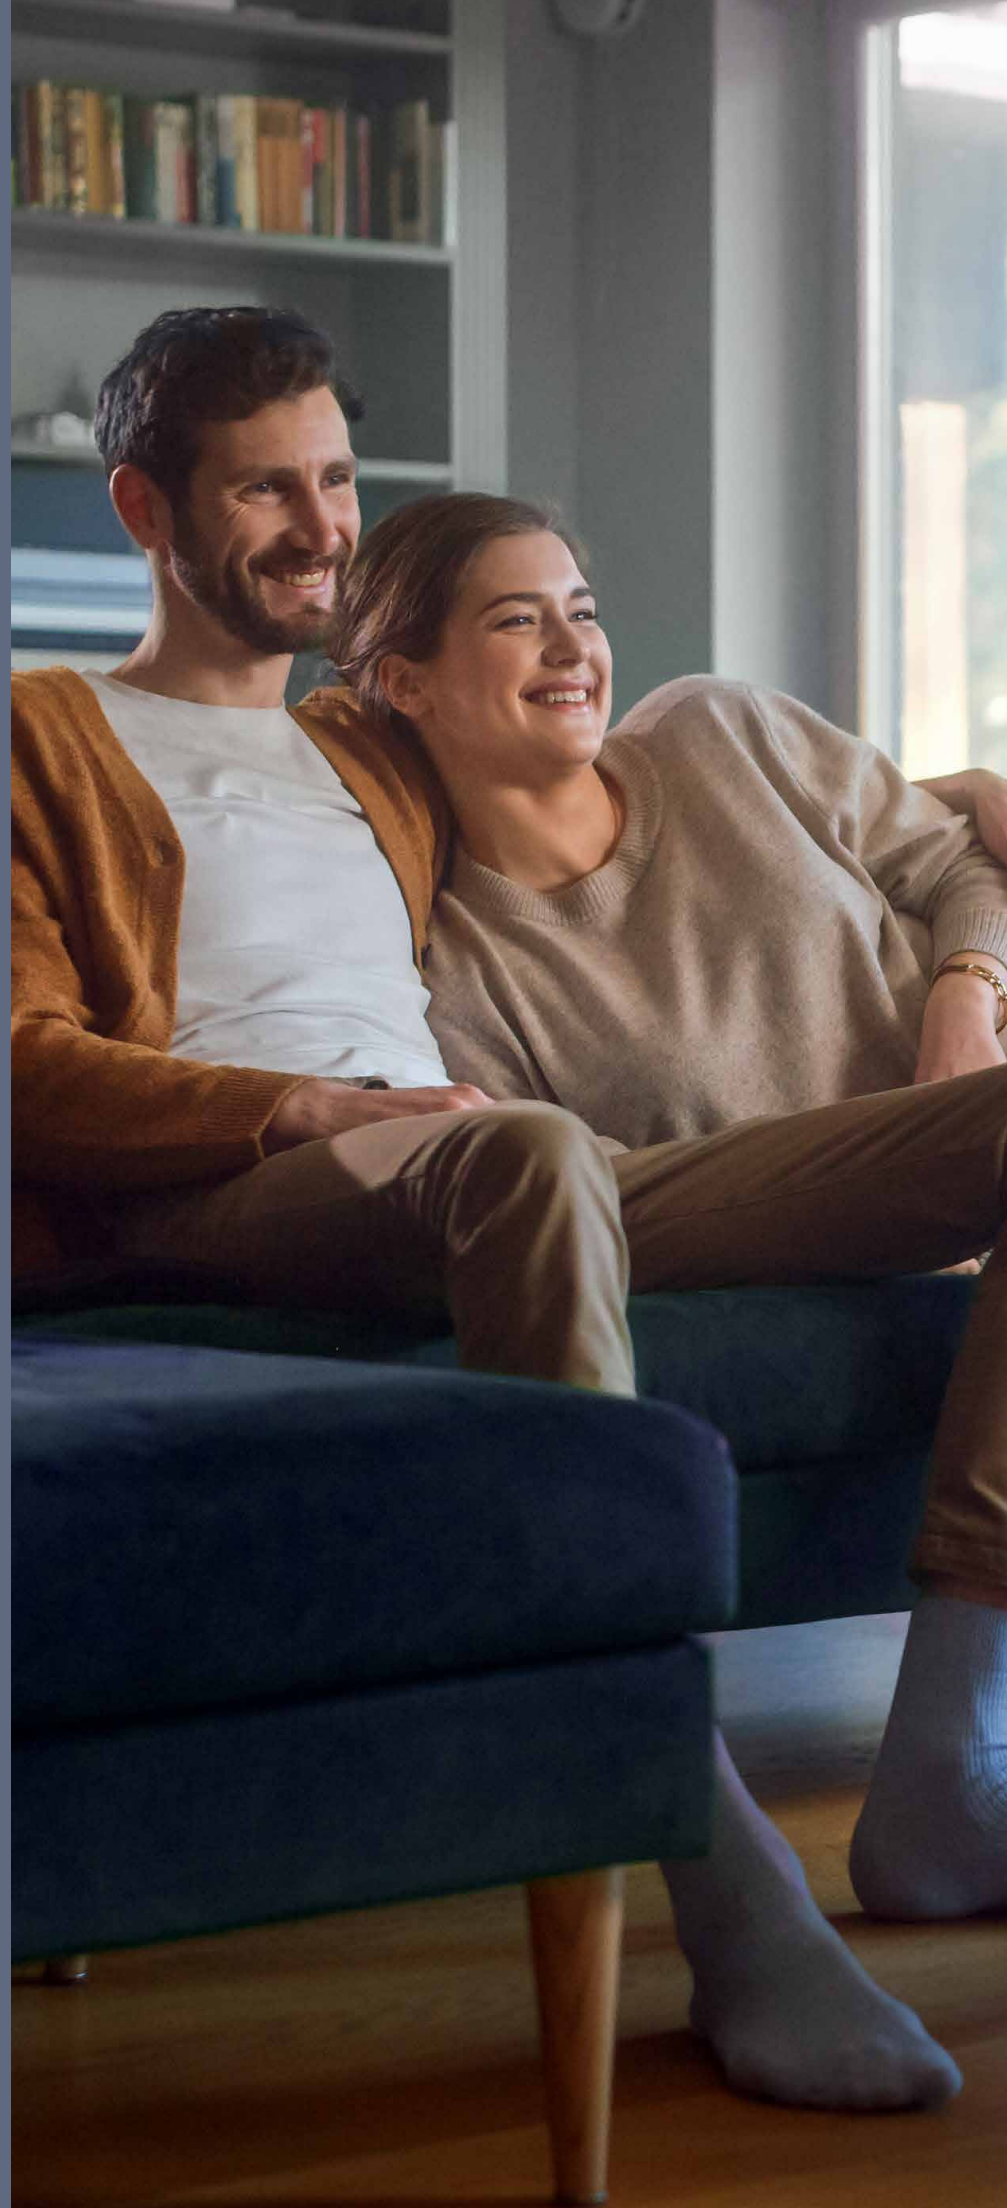

Forgoing traditional fuel sources, our range of gas stoves offer the warmth of an open fire with a level of ease that traditional stoves cannot match.

Our gas fires emit a powerful burn but also don't require a chimney for use. Instead, a certified gas engineer can install your fire in combination with a flue system to remove runoff. Each of our models is compatible with natural gas and LPG, making a mains connection non-essential.

Our gas stoves are constructed from a premium-grade heavy gauge steel for robust durability and the guarantee of many years of trouble-free service. Each of our gas models comes with a 3-year warranty.*

Essential stove information

Stove construction

Our range of gas stoves are constructed from premium grade heavy gauge steel, to ensure your stove provides many years of trouble-free service. Our Neo gas stoves also feature solid cast iron doors for a real sense of style and occasion. All of our stoves are designed in Great Britain and carefully engineered to meet exacting specifications, for which we are renowned.

The gas fire experience

Our gas stoves feature incredibly realistic flame patterns and some of the finest ceramic logs available. Our aim is for you to enjoy your gas stove whether it is lit or not, this requirement means that we supply the most aesthetically pleasing logs possible, so that your stove remains an object of beauty all year round. The Wychwood and Neo stoves both have a range of optional extras to enhance them; from black glass internal panels to reflect the flames to add an even greater depth to the visual experience, or vermiculite panels to brighten the interior – see page 33 for more details. We also offer optional LED lighting for the Neo gas stoves to create the impression of glowing embers in the base of the firebed.

3-year warranty

Designed and engineered to the highest standards, we pride ourselves on offering a premium quality gas stove experience which is fully backed up by our 3-year warranty for your peace of mind. Full warranty details & exclusions can be found on our website <https://acrheatproducts.com/warranties>

Installation information

Your gas stove must be installed by a qualified gas engineer (Gas Safe registered in the UK and Bord Gas registered in Ireland) to ensure a safe installation. They should also confirm the suitability of the site conditions for the chosen appliance. Your ACR Stoves stockist will be able to recommend local qualified engineers or you can visit www.gassaferegister.co.uk

Balanced flue system

All of our gas stoves use a balanced flue system, so you don't even need a working chimney to install one of our stoves. A choice of three fully compatible balanced flue kits make installation a straightforward process (see page 30 for more information).

Remote controls and accessories range

We offer a range of accessories and remote-control options for your convenience and to enhance your stoves operation. Please see the individual stove product pages within this brochure for accessory and remote-control options for each model, and page 29 for more detailed accessory information. All of our gas stoves are supplied with a remote control, there are two types available, each allowing a specific degree of control and interactivity with your stove. The Wychwood is supplied with a Puck remote control allowing you to easily ignite and adjust your stove's output. The Neo range is supplied with a multi-function Symax remote control – this further enhances your stove by adding a seven-day programmable timer.

*All warranties cover all stove castings, they do not include consumable items such as glass and door seals. The full warranty is only honoured when the stove is purchased from one of our recommended dealers. If a stove from any of our brands is purchased from a non-recommended dealer only a 12-month warranty will be honoured. Full details on this policy can be found in our warranty section of the website and full warranty details can be provided by our recommended dealers.

Neo 3P

6.75kW

Excellent as a freestanding feature for appreciating the flourishes of your gas fire. A fit for rooms needing a powerful hub for their warmth, whether that's a living room, open plan kitchen/living space or a relaxing orangery.

The Neo is a real talking point for guests, with it's modern look that commands attention, whilst providing the warmth and cosy feel you want for your home, perfectly capturing the aesthetic and cosy glow of its woodburning counterpart.

- 🔥 Natural Gas or LPG.
- 🔥 Balanced flue – 3 types of kit available (see page 30).
- 🔥 Top or rear flue.
- 🔥 Supplied as standard with a Symax remote control.
- 🔥 Matt black stove paint finish.
- 🔥 Realistic logs that replicate the burn pattern of a multi-fuel stove.
- 🔥 Cast iron door and top.
- 🔥 Stainless steel handle.
- 🔥 3-year warranty.

Additional Accessories

- 🔥 Optional black glass internal back panel for added reflection of the flames.
- 🔥 Optional vermiculite internal back panel for additional brightness inside the stove.
- 🔥 Optional LED lighting kit for optimum realism.*
- 🔥 Optional black glass top panel (top and rear flue installations).

The Kelowna gas stove offers an elegant balance of modern design and dependable performance. It is ideally suited to medium and larger living spaces, including open-plan rooms and orangeries, where it can be appreciated as a freestanding focal point.

Designed to reflect the character and warmth of a traditional woodburning stove, the Kelowna features a realistic ceramic log set and a black glass internal back panel, enhancing flame depth and reflection for an inviting, natural-looking fire. Its clean, contemporary lines ensure it sits comfortably in both modern and traditional interiors.

Finished in matt black stove paint, with a cast iron door and top and a subtle brushed steel handle, the Kelowna combines durability with refined detailing. Supplied as standard with an ACR remote control, it offers simple, responsive operation and everyday convenience.

Available for use with natural gas or LPG, and supported by a 3-year warranty, the Kelowna gas stove delivers reliable warmth, visual appeal, and effortless comfort.

The Kelowna with log store in the base.

Wychwood

6.1kW

The large Wychwood gas stove, with its landscape viewing panel, creates a stunning focal point in any home. A fire that's best suited to an opening where it can be seen as much as it's felt, transforming your living space into a cosy retreat, where you can relax and unwind.

With its clever styling, the Wychwood is suited for both traditional and contemporary homes. Its realistic ceramic logs have been chosen to ensure that they give an impressive flame effect when lit, whilst looking authentic when the stove isn't being operated.

- 🔥 Natural Gas or LPG.
- 🔥 Balanced flue – 3 types of kit available (see page 30).
- 🔥 Top or rear flue.
- 🔥 Matt black stove paint finish.
- 🔥 No handle for maximum glass viewing panel.
- 🔥 Remotely controlled with Puck remote (upgrade available to the Symax remote control).
- 🔥 Ceramic logs.
- 🔥 3-year warranty.

Available accessories

- 🔥 Optional black glass or vermiculite internal back panel for added reflection of the flames.

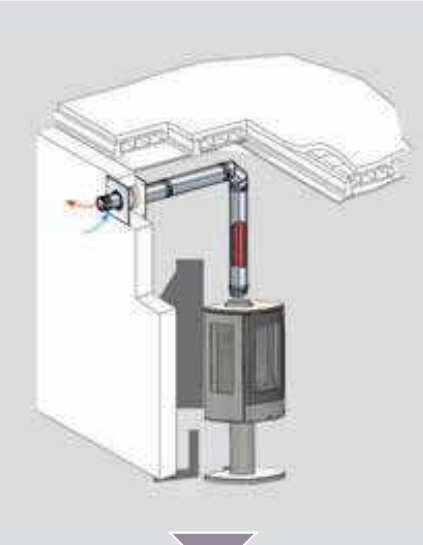

The Wychwood features an ultra-realistic burner and logs with glowing embers and detailed flame pattern.

Gas Stove Balanced Flue Kits

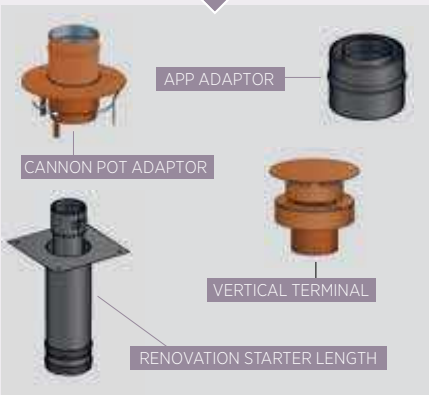

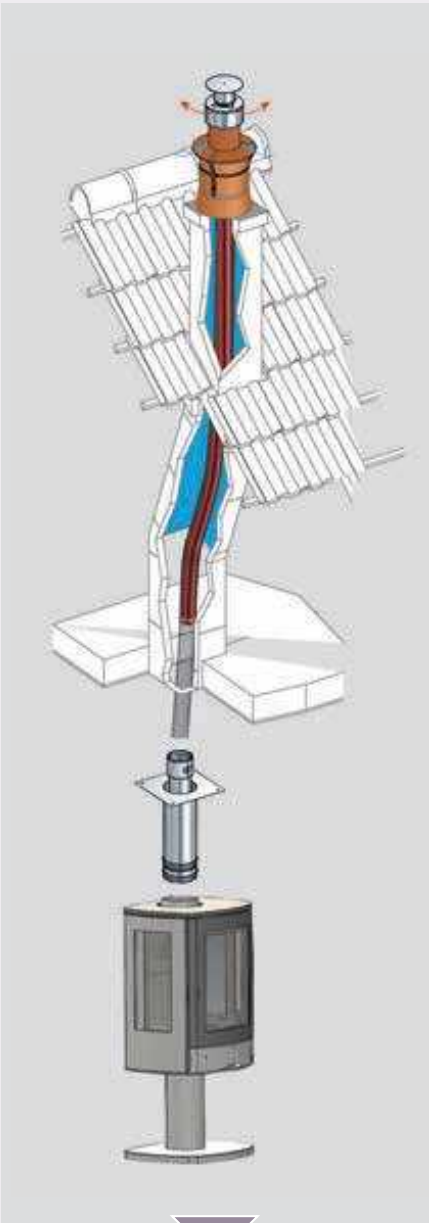

A choice of three balanced flue kits are available for use with your ACR gas stove. Our gas stoves have been tested and approved with the use of Poujoulat flue kits as per the below specifications. Please consult your ACR stove dealer if you require further information regarding balanced flue installation.

Kit 1:
Up and Out Kit*
Allows the stove to be installed from the top with a 450mm vertical length of pipe before going into a bend and out through the wall. Available in stainless steel and black finishes.

Kit 2:
Snorkel Kit*
Allows the stove to be installed from the rear flue exit and straight through the wall into a snorkel terminal. Available in black finish only.

Kit 3:
Renovation System Kit
Allows the stove to be installed into an existing chimney system with the use of additional flexible liners. Available in black finish only.

*The standard kit allows for the terminal to go through a wall with a maximum 500mm thickness. If the wall is more than 500mm thick alternative options are available. Please contact your ACR stockist for further information.

Electric Accessories

Our accessory range has been designed exclusively to complement our electric stove range and enhance your installation.

Please note these accessories are not suitable for use with either woodburning or multi-fuel stove applications.

Neo Black Glass Top Plate

With a deep gloss black finish, our 6mm thick glass top plate adds a distinctive finish to the Neo electric stoves.

Black Glass Hearths

Our 6mm thick glass hearth plates are the ideal way to display your electric stove. With a deep gloss black finish, there are options for either a corner setting, or a versatile rectangular format that can be sited against a wall or used Freestanding. Our glass hearths are suitable for use with all stoves in our electric range.

Malvern Log Store Base

Add a log-store base section to the standard Malvern electric stove for an authentic woodburning stove look.

Neo 3C Cupboard Base

An attractive storage base that can be added to the Neo 3F electric stove to create a Neo 3C cupboard style stove.

Electric Stove Flue Pipe

Specially designed flue pipe kit to further enhance your stove installation and to create a convincing setting. Straightforward magnetic installation, suitable for all ACR electric stoves.

Gas Accessories

We offer a range of options and accessories designed especially to enhance your gas stove installation and tailor the stove to meet your preferred styling requirements. We also offer remote control options for all our gas stoves.

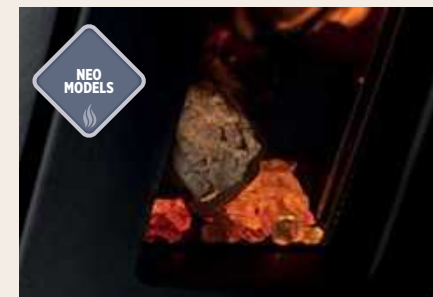

Gloss Black Glass Top-Plate

A feature gloss black glass top plate for the Neo range of gas stoves, bringing an extra visual dimension to your installation. Available for both top and rear flue installations.

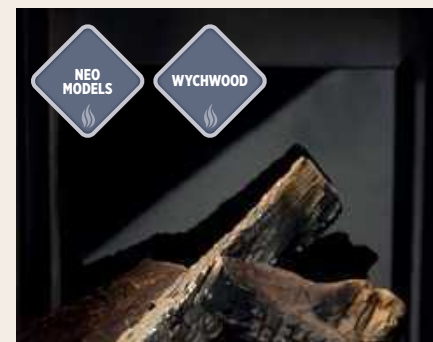

LED Lighting Kit

Consists of dimmable LED lighting under the burner along with crystals on the burner for additional glowing illumination. Featuring settings for constant light or to pulsate for the ultimate in realism. Requires a standard domestic electric power supply.

Black Glass Interior Back Panel

A gloss black glass panel that mirrors the flames to enhance the visual effect even further. Available for all ACR gas stoves.

Vermiculite Interior Panels

Adds brightness to the firebox, replicating the interior of a traditional woodburning or multi-fuel stove.

Kelowna Cupboard Base

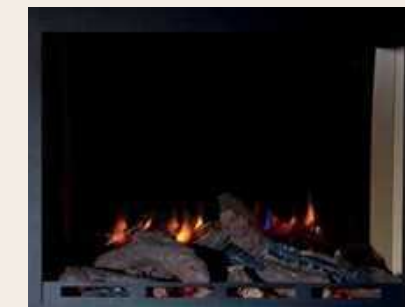

An attractive accessory for the Kelowna, to add height and to create an authentic woodburning look.

App Control

Full control at your fingertips.

All of our electric inserts and stoves feature LED 3D holographic flame projection for an ultra-realistic fire effect.

'Flame Projection Technology'* creates flames in front, centre and rear of the fuel bed.

There is also an option of 16 selectable flame colourways for all of our inserts and stoves. The effect can be adjusted from a soothing glow through to a welcoming log fire.

All adjustable from the supplied intelligent remote control or the downloadable ACR App.
